

Integrated Learning Hub

Not Your Boring Architecture Class

👋 **Hey Future Designers!**

Welcome to the Integrated Learning Hub — where learning architecture is NOT just books and lectures. Here, you'll explore design using AR, VR, and interactive tools that make learning feel more like a game than a class 🎮.

No stress. No confusion. Just **learn**, **explore**, and **create** at your own pace.

About Integrated Learning Hub

The **Integrated Learning Hub** is a dynamic digital platform designed to transform the way architecture is taught and experienced. By combining immersive technology, interactive learning tools, and structured educational content, this hub creates a seamless connection between theoretical knowledge and practical application.

This platform supports students, educators, and industry practitioners in exploring architectural design through innovative and engaging methods. It promotes a flexible and student-centred learning environment where users can learn at their own pace while actively engaging with digital content.

What's Inside?

AR & VR Experience

Scan. Tap. BOOM 🌟
Your design comes to life in 3D.
Walk through your ideas like it's real.

Learn Faster with Videos

Watch, pause, replay.
No rushing. No missing out.

Easy Learning (No Headache 🤖)

We break things down so you actually understand:

- Architecture basics
- BIM (yes, the real industry stuff)
- Digital design tools

Step-by-step. Simple. Clear.

Hands-On + Digital = 100

Use interactive kits + AR together.
Build it physically, then see it digitally.
Best of both worlds.

Team Up & Share

See what others are creating 👁️
Work together. Get inspired. Level up your ideas.

Why You'll Love This

It's fun (finally 😊)

It's interactive (not passive)

It's flexible (your pace, your time)

It's real-world ready (not just theory)

What We Offer

Integrated Learning Modules

The Curriculum

01 Background

Access structured modules covering key areas such as architectural design, Building Information Modelling (BIM), and 3D Modelling & Animation. Each module is designed to support step-by-step learning and practical understanding.

02 Solution

The CDIO Integrated Learning Experience Module was designed for the Diploma in Architecture programme. This project integrates three core discipline courses. A CDIO project was proposed and implemented for students. The outputs of the project include a building model, working drawings, and a video animation, all of which address the evaluation tasks of each course.

Immersive Learning Experience

Immersive Technology

01 Background

The rapid evolution of technology, change how we learn. Immersive Technology in Architecture is the elective course introduce in Architecture Programme.

02 Solution

Immersive technology help students work with their design project virtually in real time, Students able to explore and experience the project like in a real world.

Digital Resources

The Learning Materials

01 Background

Gain access to a wide range of learning materials including notes, manuals, tutorials, and instructional videos to support continuous learning.

02 Solution

Our educators were actively develop digital content, ebooks, videos & immersive technology.
